

R 36 with intermittent working method

Our accomplishments for your Benefit

- Stop-and-go function for surface-gentle straightening
- Constant wire quality due to synchronized drives for infeed and rotor
- Independently or in combination with a subsequent machine
- High performance by means of weight-reduced rotors
- Expanded extension concept

Features

- Infeed and rotor are stopped during the cutting operation.
- Working range:
 - DR-Rotor 2 – 5 mm max. 800 N/mm²
 - DR-Rotor 3 – 6 mm max. 800 N/mm²
 - DR-Rotor 4 – 8 mm max. 800 N/mm² (with B-Version)
 - For steel wire, stainless steel and galvanized wire
- Quick-change system for rotos (option)
