

FMU 1.7, FMU 16 (+), FMU 20 (+) Coiling plate holder for large wire diameters

Tool-change system

The coiling plate holder 3-cornered coiling plates can be installed in two different positions (for left and right springs). This helps to realize a stable coiling process for large spring diameters.

- Coiling plate Holder wire diameter 0.5–1.0 mm
- Coiling plate Holder wire diameter 1.1–1.6 mm
- Coiling plate Holder wire diameter 1.7–2.0 mm

Your benefit

- Flexible tool system for faster tool change
- Price advantages due to triple-use coiling plates for high batches
- All components separately and available
