

Modular Coiler Set – MCS

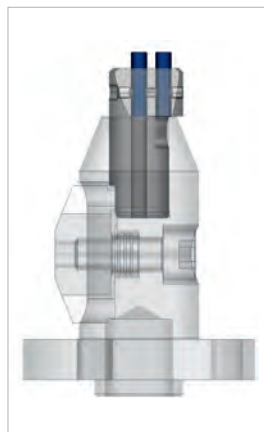

Optimization of Costs through Modularity

Description

The modular coiler set for Wafios machines of series FMU and FMK allows through its free configurability the highest possible flexibility during the production process for an attractive price. Via the easy configurability, short set-up times and the comfortable replacement of worn out parts cuts cuttings can be realized quickly.

▲ Modular Coiler Set with pins

▲ Modular Coiler Set with Coiler head

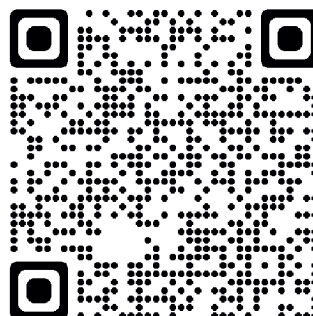

▲ Tool box

Machine Types:

- Series FMU 1 - FMU 50+
- FMK 2
- FMK 3
- Other types on request

Our Accomplishments for your Benefit

- Cost cuttings by flexibility and short set-up times
- Freely configurable coiling and bending tool
- Flexible tool solution through quick tool exchange
- Neatly arranged set in a tool box
- Interchangeability for machines of the same machine type series
- All components available individually
